ABOUT TALYME

A Nairobi firm built on engineering discipline.

Talyme Technologies is a dynamic ICT company headquartered in Nairobi, Kenya. Founded in 2021 by CEO Nfatally Muiru, we have grown into a trusted technology partner for more than 200 organisations across Kenya — from boutique offices to multi-site institutions in finance, healthcare, education, hospitality and government.

Our promise is simple: strategic counsel before sales, engineering discipline during delivery, and operational care long after handover. Every install is documented. Every engineer is certified. Every relationship is built to last.

MISSION

Smart Support. Stronger Systems. Better Business — delivered with engineering discipline and human care.

VISION

To be East Africa's most trusted ICT partner for organisations that take technology seriously.

WHAT WE DO

Six disciplined practices, under one roof.

01 ICT Consultancy

Strategic guidance that aligns technology investments with measurable business outcomes — strategy, security, cloud transformation and infrastructure design.

02 Internet Installation

Enterprise-grade fibre and wireless connectivity engineered for uptime — for offices, institutions and estates, SLA-backed.

03 CCTV & Surveillance

HD and 4K IP cameras with night vision, remote mobile access, smart motion alerts and NVR / cloud recording.

04 ICT Support

Proactive, end-to-end IT support — helpdesk, onsite engineers, network monitoring, backup and quarterly health reviews.

05 Computer Sales

Trusted hardware from Dell, HP, Lenovo and Apple — configured, imaged, asset-tagged and warranted in-house.

06 Access Control

Biometric and credentialed entry systems with audit trails, time & attendance and CCTV integration.

OUR APPROACH

Four principles that shape every brief.

I — Strategic Counsel

Discovery before hardware. We map your business context before specifying a single piece of equipment.

II — Engineering Discipline

Certified engineers. Vendor-grade equipment. Documented deployments. No shortcuts, no surprises.

III — Operational Care

A relationship that continues long after handover, with proactive monitoring and human support.

IV — Transparent Value

Clear scopes. Itemised proposals. Honest timelines. You always know exactly what you are paying for.

THE PROCESS

From conversation to continuous care.

01 · Consult	A complimentary discovery session to map your goals, constraints and current state.
02 · Design	A bespoke proposal — solution architecture, timeline and transparent costs.
03 · Deploy	Certified engineers install, configure and validate with minimal business disruption.
04 · Care	Continuous monitoring, helpdesk access and a dedicated account contact.

INDUSTRIES SERVED

Trusted across every sector.

Corporate Offices	Healthcare	Education	Financial Services
Hospitality	Retail & SMEs	Government	Residential Estates

WHY TALYME

Six reasons leaders choose us — and stay.

Certified Engineers

Every site visit is led by an engineer accredited by the platforms they install.

SLA-backed Uptime

Documented service levels and same-day fault response on every managed contract.

Vendor-Neutral Counsel

We recommend what works for you — not what carries the highest margin.

Documented Handover

Every install ships with diagrams, credentials and a walkthrough for your team.

Single Account Contact

One person who knows your environment. No ticket-shuffling, no re-explaining.

Continuous Care

Quarterly health reviews. Proactive monitoring. The relationship continues after handover.
